

To whom it may concern,  
I am concerned about the possible effects that the new LPFM signals might have on the radio station that I listen to. I listen to WJKL transmitting out of Elgin, IL located on 94.3FM. WJKL a/k/a KLOVE offers positive music and entertainment that I know my children can listen to. They do not have the 'shock jock' mentality that is so prevalent in society today. I would certainly hate to lose the 94.3FM signal that I now get to enjoy.  
Thank you for the time.  
Sincerely,  
Jay Oberrieder
